MARCELINO SANDRONI DIAS

Senior Software & AI Engineer

Engenharia que conecta sistemas distribuídos, produto e resultado financeiro.

Location: Fortaleza, CE (Fully Remote) **Email:** marcelino.sandroni@gmail.com **WhatsApp:** +55 11 91446-1993

LinkedIn: linkedin.com/in/marcelinosandroni **Git:** github.com/marcelinosandroni **Portfolio:** marcelinosandroni.com

PROFESSIONAL SUMMARY

A genuine full-stack engineer, pairing strategic vision and business analysis with end-to-end delivery across UI/UX, mobile, frontend, backend, DevOps, data engineering and AI. Six years in software engineering and fifteen in financial governance, building scalable solutions and critical systems that move billions of reais.

KEY PRODUCTION IMPACT METRICS

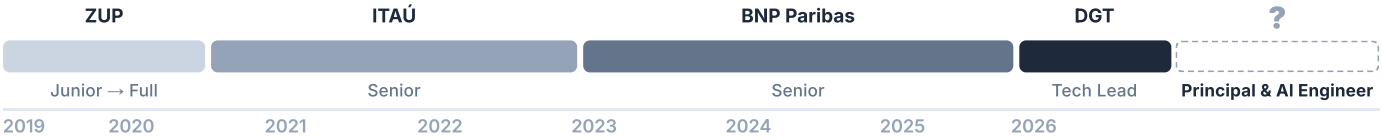

+R$ 500Bn
ASSET MANAGEMENT
Building and maintaining critical applications for fund custody.

D+0 (Real-Time)
SYNCHRONOUS SETTLEMENT
Engineering a real-time payment processing system.

100M+ msgs/dia
HIGH SCALE
Architecture for asynchronous event processing.

R$ 24M/ano (ROI)
ARTIFICIAL INTELLIGENCE
Contract saved through state-of-the-art AI implementation.

CAREER TIMELINE

TECHNICAL SKILLS & SOFTWARE ARCHITECTURE

Frontend & UI Architecture: React, Next.js, Angular, Vue.js, React Native, TypeScript, JavaScript, Micro-frontends (Module Federation), RxJS, NgRx, SSR, Storybook, Tailwind CSS, Design Systems, Flutter.

Backend & Frameworks: Java (Spring Boot), C# (.NET Core), Node.js (NestJS), Go, Python, RESTful APIs, gRPC, Clean Architecture, DDD, CQRS, SOLID, WebSockets.

Data & Messaging: Oracle, PostgreSQL, SQL Server, MySQL, MongoDB, Redis, ClickHouse, Databricks, Apache Kafka, RabbitMQ, Event Sourcing, Circuit Breakers.

Cloud, DevOps & SRE: AWS, GCP, Azure, Oracle Cloud, IBM Cloud, Docker, Kubernetes (Helm/HPA), Terraform, CI/CD, OpenTelemetry, Prometheus, Grafana, Jaeger, FinOps.

AI & Governance: PyTorch, TensorFlow, YOLOv8, LangChain, MLflow, RAG, Agentes LLM, Visão Computacional, TDD, BDD, Testes E2E, SonarQube, SOX, IFRS/CPC.

PROFESSIONAL EXPERIENCE

Senior Software Engineer & Tech Lead | DGT

(1 year) · Oct/2025 – Sep/2026 · Remote

Stack: Java, Spring Boot, Spring AI, Angular, TypeScript, Micro-frontends, PostgreSQL, Redis, RabbitMQ, gRPC, K8s, AWS.

- **Technical Leadership & AI Integration:** Led an 8-person squad through the restructuring of critical systems processing 100M+ messages/day. Corporate AI wired into the backend through Spring AI for real-time agentic flows, protecting a R$ 24M/year contract.
- **10x Faster Processing:** Migrated a bottlenecked relational architecture to Java microservices, with JVM tuning (ZGC) and low latency over gRPC and RabbitMQ.
- **Enterprise Micro-frontends:** Complex web interfaces in Angular, with reactive state (RxJS/NgRx), keeping the experience smooth under heavy load.

Senior Software Engineer | BNP Paribas

(2 years and 10 months) · Dec/2022 – Sep/2025 · Hybrid

Stack: Java (Spring Boot/Batch), Angular, Micro-frontends, Oracle SQL, Kafka, OAuth2, Kubernetes, Jenkins, Helm.

- **Bank Monolith Modernisation:** Technical pillar of a 12-engineer tribe, decoupling legacy systems (COBOL, VB) into event-driven architecture in Java with modular Angular interfaces (95% test coverage).
- **D+0 Settlement & Real Time:** Replaced D+1 pipelines with real-time fund reconciliation on Apache Kafka and Spring Batch, lifting assets under management by 45% with a 100% uptime SLA.
- **Global Cost and Orchestration:** Automated institutional ETF orchestration across B3 and international exchanges, with an estimated R$ 50 million in new inflows.

Senior Software Engineer | ITAÚ

(2 years and 5 months) · Jul/2020 – Nov/2022 · Hybrid

Stack: Java (Spring WebFlux), Angular, TypeScript, PostgreSQL, Redis, Kafka, AWS, Docker, Kubernetes, Terraform.

- **Strategic Institutional Custody (+R$ 100 Bn):** Co-led a 15-engineer squad designing and running a B2B platform connected to B3, on cloud-native AWS with reactive Java APIs and Angular dashboards.
- **Crisis Management and Resilience:** Resolved Kafka concurrency bottlenecks under heavy volatility in under 24 hours, enforcing strict transactional idempotency.
- **8x Quality Improvement:** Technical mentoring and E2E automation (CI/CD), shielding the codebase from critical regressions.

Full Software Engineer | ZUP

(1 year and 4 months) · Mar/2019 – Jun/2020 · Remote

Stack: Java, Angular, TypeScript, PostgreSQL, Redis, RabbitMQ, AWS, Docker, Kubernetes, CI/CD.

- **Rapid Progression and Cloud:** Promoted from Junior to Full within one year. An agile team of six engineers refactoring Java monoliths onto event-driven architecture, and migrated to AWS in half the agreed schedule.
- **Transactional Resilience:** Rebuilt asynchronous messaging reliability on RabbitMQ with circuit breakers and dead-letter queues, reaching 100% data accuracy.

Accounting Analyst & Finance Manager | Consultoria Corporativa

(15 years and 6 months) · Jul/2003 – Dec/2018 · Onsite

- **Corporate Engineering Edge:** Team leadership and process redesign that cut the accounting close by 83%. Deep expertise in finance and tax rules, translated directly into software teams.

ACADEMIC EDUCATION & SPECIALIZATIONS

BSc in Computer Engineering — UNIVESP 2021 – 2026

BSc in Accounting — Estácio (Governance and Financial Analysis) Completed 2017

LANGUAGES

Portuguese: Native. **Spanish:** Basic (able to read technical material and handle written communication).

Professional English: Fluent across corporate work, business meetings, client negotiation, architecture discussions, stand-ups and code reviews.

ADDITIONAL INFORMATION & PROFESSIONAL PROFILE

Availability: Immediate, available for fully remote work (global).

Engagement: Wide flexibility. Available for full-time (employee or contractor), part-time, or on-demand consulting (fixed-scope modernisation projects) in Brazil, the US and Europe.

Communication: Assertive and transparent. Proven ability to negotiate requirements, align on delivery expectations and shield the engineering team from noise, keeping executive reporting and critical production incidents unambiguous.

Leadership: Orchestrating agile squads and moving fluidly between strategic alignment with C-levels and execution with engineering teams. Active mentoring focused on raising the bar for junior and mid-level developers.

Governance: Absolute ownership and proven resilience through crisis. Specialist at translating complex business rules and financial-market regulation directly into software systems that are secure, scalable and highly reliable.
