MARCELINO SANDRONI DIAS

Senior Software & AI Engineer

Location: Fortaleza, CE (Fully Remote) **Email:** marcelino.sandroni@gmail.com **WhatsApp:** +55 11 91446-1993

LinkedIn: linkedin.com/in/marcelinosandroni **Git:** github.com/marcelinosandroni **Portfolio:** marcelinosandroni.com

PROFESSIONAL SUMMARY

A genuine full-stack engineer, pairing strategic vision and business analysis with end-to-end delivery across UI/UX, mobile, frontend, backend, DevOps, data engineering and AI. Six years in software engineering and fifteen in financial governance, building scalable solutions and critical systems that move billions of reais.

KEY PRODUCTION IMPACT METRICS

+R$ 500Bn
ASSET MANAGEMENT
Building and maintaining critical applications for fund custody.

D+0 (Real-Time)
SYNCHRONOUS SETTLEMENT
Engineering a real-time payment processing system.

100M+ msgs/dia
HIGH SCALE
Architecture for asynchronous event processing.

R$ 24M/ano (ROI)
ARTIFICIAL INTELLIGENCE
Contract saved through state-of-the-art AI implementation.

PROFESSIONAL EXPERIENCE

Senior Software Engineer & Tech Lead | DGT Tecnologia

Jan/2026 – Set/2026 · Remote

Front/Mobile: React, Next.js, Angular, React Native, JavaScript/TypeScript, Micro-frontends, TailwindCSS.
Back/Data: C# .NET, Go, Nodejs, Python, PostgreSQL, MySQL, MongoDB, Redis, Databricks, RabbitMQ.
DevOps & AI: AWS, Oracle Cloud, Kubernetes, Docker, Jenkins, CI/CD, Terraform, PyTorch, TensorFlow, YOLOv8, LangChain, MLflow, Agentes LLM, SDD (Spec Driven Development) e AI Oriented Development (Claude, Codex).

- **Rescued a R$ 24M/year contract (R$ 2M/month):** Led the architectural rebuild of an AI and computer-vision engine, raising license-plate read accuracy from <60% to a full 100%.
- **10x processing speed-up (100M+ events/day):** Migrated a bottlenecked relational architecture to a ClickHouse columnar cluster with ETLs and distributed microservices in Go/.NET.
- **Mobile interfaces and micro-frontends (pixel-perfect):** Built robust web interfaces and apps (React, Next.js, Angular, React Native) on reusable micro-frontends, delivering pixel-perfect work with a UI/UX standard aimed at engagement.
- **CI/CD automation & LLM agents:** Shipped declarative pipelines on Kubernetes with E2E tests (Playwright) and AI-generated code review, holding coverage above 90%.

Senior Software Engineer | Antlia / BNP Paribas

Mar/2023 – Dez/2025 · Hybrid

Front/Mobile: Angular, React, Next.js, JavaScript/TypeScript, Tailwind CSS, Design Systems, Micro-frontends.
Back/Data: Java (Spring), C# (.NET), Python, Go, Oracle SQL, MySQL, PostgreSQL, Redis, Kafka, RabbitMQ
DevOps & AI: Docker, Jenkins, CI/CD, IBM Cloud, AWS, Azure, Kubernetes, Helm, RAG, LangChain e Claude.

- **Core banking monolith modernisation:** Decoupled critical COBOL and VB legacy systems into an event-driven architecture with micro-frontends, reaching 95% test coverage.
- **D+0 settlement & real-time payments:** Replaced D+1 pipelines with real-time synchronous and asynchronous fund reconciliation at a 100% uptime SLA, with no accounting impact.
- **Cost and scale (+R$ 50M/year):** Automated global ETF orchestration under SOX compliance, creating the operating capacity to attract large institutional fortunes.

PROFESSIONAL EXPERIENCE (CONTINUED)

Software Engineer | Banco Itaú — **Mar/2022 – Fev/2023 · Hybrid**

Front/Mobile: JavaScript/TypeScript, Angular, React, Flutter, Micro-frontends, Tailwind CSS, Design Systems.
Back/Data: C# (.NET), Java (Spring), Node.js, Python, PostgreSQL, Redis, Kafka, RabbitMQ.
DevOps & AI: AWS, Docker, Kubernetes, IaC Terraform, CI/CD, Cypress, Processamento de Dados Preditivos.

- **Strategic institutional custody:** Designed and sustained a B2B platform integrated with B3 for continuous accrual and a unified multi-portfolio view serving very high net worth investors.
- **Crisis management and resolution in <24h:** Cleared a critical concurrency bottleneck in messaging under highly volatile traffic with transaction integrity intact.
- **Mentorship and full-stack QA (8x quality):** Built and trained the team on end-to-end automated testing across backend (Java/Node), frontend (React) and data architecture.

Full Software Engineer PROMOTED IN 3 MONTHS | Pollux Technology — **Fev/2021 – Fev/2022 · Remote**

Front/Mobile: React, Next.js, Angular, JavaScript/TypeScript, Micro-frontends, Tailwind CSS, Design System.
Back/Data: NodeJS, Java (Spring), C# (.NET), Go, Python, PostgreSQL, MySQL, MongoDB, Redis, RabbitMQ
DevOps & AI: AWS, GCP, Kubernetes, Docker, Terraform, Automação IA Básica.

- **Accelerated cloud migration:** Led the full move to AWS infrastructure, delivered in half the estimated time and doubling system performance.
- **FinOps and cloud optimisation:** Cut costs by 50% through auto-scaling policies and right-sizing on AWS.

Accounting Analyst & Finance Manager | Corporate Consulting (15 Years) — **Jul/2005 – Dez/2020 · São Paulo**

Core Business: FinOps, Automação de Processos ERP, IFRS & CPC, SOX Compliance, Tax Planning. Strategic edge: business insight, financial reporting and compliance applied to tech development.

- **Month-end close accelerated 10x:** Redesigned processes cutting the cycle from 30 days to 2.
- **Cost and profitability (+R$ 3M):** Executed a rigorous tax plan that generated seven-figure savings and precise working-capital allocation.

ACADEMIC EDUCATION & SPECIALIZATIONS

BSc in Computer Engineering — UNIVESP — **2021 – 2026**

BSc in Accounting — Estácio (Governance and Financial Analysis) — **Completed 2017**

LANGUAGES

Portuguese: Native **Spanish:** Basic - simple communication, enough for day-to-day work
English: Professional - 100% autonomous in the SWE workflow (stand-ups, code reviews, docs and requirements negotiation).

ADDITIONAL INFORMATION & PROFESSIONAL PROFILE

Availability & setup: Immediate (100% remote, global). Own high-performance infrastructure for an immediate start (zero onboarding delay).

Compensation & engagement: R$ 10,000/month employee or R$ 14,000/month contractor. Open to B2B/contractor engagements in Brazil, the US and Europe.

Cultural fit & soft skills: *Extreme ownership*, resilience through critical incidents, direct and assertive communication (from C-level to the engineering floor), agile delivery and self-teaching ability to adopt new stacks fast.
