MARCELINO SANDRONI DIAS

Senior Software Engineer | Angular + Java + AI

Engenharia que conecta sistemas distribuídos, produto e resultado financeiro.

Location: Fortaleza, CE (Fully Remote)
Email: marcelino.sandroni@gmail.com
WhatsApp: +55 11 91446-1993

PROFESSIONAL SUMMARY

A software engineer drawing on almost eight years in distributed architectures (Java, Spring, Angular, Kafka) and fifteen in corporate and financial backgrounds. I work from greenfield cloud-native ecosystems through to decoupling critical systems, building microservices, micro-frontends and corporate AI (agents/RAG) — high performance, scalability and resilience for mission-critical systems, under an uncompromising testing and observability culture.

KEY PRODUCTION IMPACT METRICS

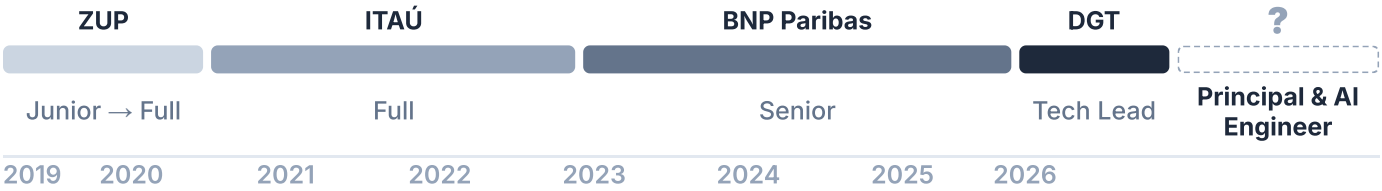

+R$ 500Bn
ASSET MANAGEMENT
B2B platforms for fund custody and orchestration.

D+0
REAL-TIME SETTLEMENT
From 24h (D+1) to under 1s, on Kafka and Java.

100M+ msgs/day
HIGH SCALE
Event-driven, fault-tolerant.

95%
TEST COVERAGE
QA and TDD culture in backend (JUnit) and frontend (Cypress).

CAREER TIMELINE IN ENGINEERING

TECHNICAL SKILLS & SOFTWARE ARCHITECTURE

Frontend & UI Architecture: Angular (8 to 22), TypeScript, JavaScript, HTML5, CSS3, SASS, Micro-frontends, State/Reactivity (RxJS, NgRx), SSR, Tailwind CSS, Angular Material, Design Systems.

Backend & Frameworks: Java (8 to 25), Spring Boot 3.x (AOT/GraalVM), Spring Cloud, Spring WebFlux, Spring Batch, Spring Security (OAuth2, OIDC, JWT, mTLS), Hibernate/JPA (N+1), JVM tuning (ZGC/G1GC).

Artificial Intelligence & Data: Corporate LLMs via Spring AI and LangChain4j, Amazon Bedrock (Claude/Titan), RAG, agentic workflows (function calling), vector databases (pgvector, Milvus).

Cloud & DevOps: AWS (EKS/ECS, S3, RDS, SQS, SNS, Lambda, API Gateway, CloudWatch), Docker, Kubernetes (Helm), Terraform, CI/CD (GitHub Actions, Bitbucket, Jenkins), observability (OpenTelemetry, Datadog).

Architecture, APIs & Messaging: REST Level 3, gRPC, GraphQL, WebSockets, Kafka (partitions, idempotency), RabbitMQ (exchanges, DLQ), circuit breakers, clean, hexagonal, DDD, CQRS, SOLID, EDA, microservices.

Analytics Ecosystem & Databases: Oracle, PostgreSQL, SQL Server, MongoDB, Redis, Cassandra, Neo4j, DynamoDB, DocumentDB, Snowflake, Databricks.

ACADEMIC EDUCATION & SPECIALIZATIONS

BSc in Computer Engineering — UNIVESP, 2021 – 2026

BSc in Accounting — Estácio, completed 2017

LANGUAGES

Spanish: Básico — reading technical material and written communication.

Professional English: Fluent — meetings, negotiation, architecture and code review.

PROFESSIONAL EXPERIENCE

Senior Software Engineer & Tech Lead | DGT — **(1 year) · Oct/2025 – Sep/2026**

Stack: Java, Spring Boot, Spring AI, Angular, TypeScript, Micro-frontends, PostgreSQL, Redis, gRPC, K8s, Azure.

- **Technical Leadership & High Concurrency (Java 21):** Squad leadership restructuring critical ecosystems processing 100M+ messages/day. Application of Virtual Threads (Loom), gRPC and CQRS architecture with Redis/PostgreSQL sharding to guarantee ultra-low latency under massive traffic.
- **Distributed Resilience (Azure Ecosystem):** Event-driven architecture using Azure Event Hubs and Service Bus for asynchronous orchestration. Rigorous implementation of Saga patterns (consistency) and Circuit Breakers, shielding the system against cascading failures and sustaining 100% uptime.
- **Corporate AI & Process Automation:** Conception of real-time agentic flows integrating Spring AI and Azure AI Studio (LLMs/RAG). Automation of critical operations that strangled manual bottlenecks and ensured preservation of a R$ 24M/year contract.

Senior Software Engineer | BNP Paribas — **(2 years and 10 months) · Dec/2022 – Sep/2025**

Stack: Java (Spring Boot/Batch), Angular, Micro-frontends, Oracle SQL, Kafka, OAuth2, K8s, Jenkins, Helm.

- **Event-Driven Architecture (EDA):** Strangling monoliths (Strangler Fig) into highly decoupled Java microservices. Design of an asynchronous mesh to guarantee high availability in critical transactions, with 95% test coverage.
- **Messaging & Fault Tolerance (Kafka):** Migration from batch processing (D+1) to streaming (D+0). Heavy engineering in transactional idempotency, retry patterns and DLQs, guaranteeing zero message loss and 100% uptime in reconciliation.
- **Distributed Orchestration & Consistency:** Automation of integrations (B3/global exchanges) applying Circuit Breakers and Fallbacks. Mitigation of external network instability, guaranteeing consistency and unlocking +R$ 50 million in inflows.

Full Software Engineer | ITAÚ — **(2 years and 5 months) · Jul/2020 – Nov/2022**

Stack: Java (Spring WebFlux), Angular, TypeScript, PostgreSQL, Redis, Kafka, AWS, K8s, Terraform.

- **Strategic Institutional Custody (+R$ 100 Bn):** Co-led a 15-engineer squad designing and running a B2B platform connected to B3, on cloud-native AWS with reactive Java APIs and Angular dashboards.
- **Crisis Management and Resilience:** Resolved Kafka concurrency bottlenecks under heavy volatility in under 24 hours, enforcing strict transactional idempotency.
- **8x Quality Improvement:** Technical mentoring and E2E automation (CI/CD), shielding the ecosystem from critical regressions.

Full Software Engineer | ZUP — **(1 year and 4 months) · Mar/2019 – Jun/2020**

Stack: Java, Angular, TypeScript, PostgreSQL, Redis, RabbitMQ, AWS, Docker, Kubernetes, CI/CD.

- **Rapid Progression and Cloud:** Promoted from Junior to Full within one year. An agile team of six engineers refactoring Java monoliths onto event-driven architecture, and migrated to AWS in half the agreed schedule.
- **Transactional Resilience:** Rebuilt asynchronous messaging reliability on RabbitMQ with circuit breakers and dead-letter queues, reaching 100% data accuracy.

Accounting Analyst & Finance Manager | Consultoria — **(15 years and 6 months) · Jul/2003 – Dec/2018**

- **Corporate Engineering Edge:** Team leadership and process redesign that cut the accounting close by 83%. Deep expertise in finance and tax rules, translated directly into software teams.
