MARCELINO SANDRONI DIAS

Senior Software Engineer | C# .NET + React + AI

Engenharia que conecta sistemas distribuídos, produto e resultado financeiro.

Location: Fortaleza, CE (Fully Remote)
Email: marcelino.sandroni@gmail.com

Portfolio: marcelinosandroni.com

PROFESSIONAL SUMMARY

A software engineer drawing on eight years in distributed architectures (C#, .NET, React, Kafka) and fifteen in corporate and financial backgrounds. I work from greenfield cloud-native ecosystems through to decoupling critical systems, building microservices, micro-frontends and corporate AI (Semantic Kernel/RAG) — performance, scalability and resilience for mission-critical systems, under an uncompromising observability and test automation culture.

KEY PRODUCTION IMPACT METRICS

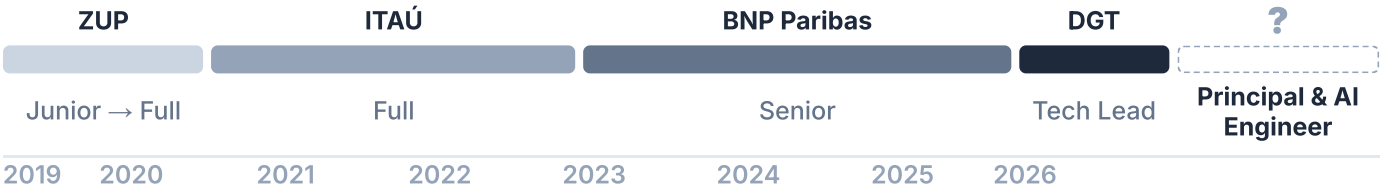

+R$ 500Bn
ASSET MANAGEMENT
B2B platforms for fund custody and orchestration.

D+0
REAL-TIME SETTLEMENT
From 24h (D+1) to under 1s, on Kafka and .NET.

100M+ msgs/day
HIGH SCALE
Event-driven, fault-tolerant.

95%
TEST COVERAGE
QA and TDD culture in backend (xUnit) and frontend (Cypress).

CAREER TIMELINE IN ENGINEERING

TECHNICAL SKILLS & SOFTWARE ARCHITECTURE

Frontend & UI Architecture: React, Next.js, TypeScript, JavaScript, HTML5, Micro-frontends, State (Zustand, Redux), SSR/SSG, Tailwind CSS, shadcn/ui, Styled Components, Design Systems.

Backend & Frameworks: C# (.NET Core 3.1 to 9), ASP.NET Core, EF Core, Dapper, gRPC, SignalR, OAuth2/OIDC, JWT, mTLS, BenchmarkDotNet, high-performance async, worker services, minimal APIs.

Artificial Intelligence & Data: Corporate LLMs via Semantic Kernel and Azure OpenAI, LangChain, Amazon Bedrock, RAG, agentic workflows (function calling), vector databases (pgvector, Milvus).

Cloud & DevOps: Azure / AWS (AKS/EKS, App Services, Blob, Service Bus, SQS), Docker, Kubernetes (Helm), Terraform, CI/CD (Azure DevOps, GitHub Actions), observability (OpenTelemetry).

Architecture, APIs & Messaging: REST Level 3, gRPC, WebSockets, Kafka (partitions, idempotency), RabbitMQ (exchanges, DLQ), circuit breakers, clean architecture, DDD, CQRS, SOLID, EDA.

Analytics Ecosystem & Databases: SQL Server, Oracle, PostgreSQL, MongoDB, Redis, Cassandra, Neo4j, DynamoDB, DocumentDB, Snowflake, Databricks.

ACADEMIC EDUCATION & SPECIALIZATIONS

BSc in Computer Engineering — UNIVESP, 2021 – 2026

BSc in Accounting — Estácio, completed 2017

LANGUAGES

Spanish: Básico — reading technical material and written communication.

Professional English: Fluent — meetings, negotiation, architecture and code review.

PROFESSIONAL EXPERIENCE

Senior Software Engineer & Tech Lead | DGT **(1 year) · Oct/2025 – Sep/2026**

Stack: C#, .NET 9, React, Next.js, Micro-frontends, PostgreSQL, Redis, RabbitMQ, gRPC, Azure OpenAI, AWS.

- **Technical Leadership & AI Integration:** Led an 8-person squad restructuring systems processing 100M+ messages/day. AI wired into the backend through Semantic Kernel and Azure OpenAI for real-time agentic flows (R$ 24M/year contract protected).
- **10x Faster Processing:** Migrated a bottlenecked relational architecture to .NET 9 microservices, with extreme I/O and thread optimisation and low latency over gRPC and RabbitMQ.
- **Enterprise Micro-frontends:** Complex web interfaces in React and Next.js, with optimised global state management (Zustand), keeping the experience smooth and lag-free under heavy data load.

Senior Software Engineer | BNP Paribas **(2 years and 10 months) · Dec/2022 – Sep/2025**

Stack: C# (.NET 8), React, Micro-frontends, Oracle SQL, Kafka, OAuth2, K8s, Azure DevOps, Helm.

- **Bank Monolith Modernisation:** Technical pillar of a 12-engineer tribe, decoupling legacy systems (COBOL/VB) into event-driven C# microservices with modular React interfaces (95% test coverage with xUnit).
- **D+0 Settlement & Real Time:** Replaced D+1 pipelines with real-time fund reconciliation on Apache Kafka and .NET worker services, lifting assets under management by 45% with a 100% uptime SLA.
- **Global Cost and Orchestration:** Automated institutional ETF orchestration across B3 and international exchanges (US/Europe), with an estimated R$ 50 million in new inflows.

Full Software Engineer | ITAÚ **(2 years and 5 months) · Jul/2020 – Nov/2022**

Stack: C# (.NET Core), React, TypeScript, PostgreSQL, Redis, Kafka, AWS (EKS/SQS), K8s, Terraform.

- **Strategic Institutional Custody (+R$ 100 Bn):** Co-led a 15-engineer squad designing a cloud-native B2B platform connected to B3, with ASP.NET Core APIs and React dashboards.
- **Crisis Management and Resilience:** Resolved Kafka concurrency bottlenecks under extreme volatility in under 24 hours, enforcing strict transactional idempotency in event consumption.
- **8x Quality Improvement:** Technical mentoring and E2E automation in CI/CD, shielding the .NET ecosystem from critical regressions and accelerating the delivery pipeline.

Full Software Engineer | ZUP **(1 year and 4 months) · Mar/2019 – Jun/2020**

Stack: C#, .NET Core, React, TypeScript, PostgreSQL, Redis, RabbitMQ, AWS, Docker, CI/CD.

- **Rapid Progression and Cloud:** Promoted from Junior to Full within one year. An agile team of six engineers refactoring C# monoliths into event-driven microservices, and migrated to AWS in half the agreed schedule.
- **Transactional Resilience:** Rebuilt asynchronous messaging reliability on RabbitMQ with circuit breakers (Polly) and dead-letter queues, reaching 100% data accuracy and failure recovery.

Accounting Analyst & Finance Manager | Consultoria **(15 years and 6 months) · Jul/2003 – Dec/2018**

- **Corporate Engineering Edge:** Team leadership and process redesign that cut the accounting close by 83%. Deep financial expertise (DDD) translated into software.
