MARCELINO SANDRONI DIAS

Senior Software Engineer | Node, React, Go & AI

Engenharia que conecta sistemas distribuídos, produto e resultado financeiro.

Location: Fortaleza, CE (Fully Remote)
Email: marcelino.sandroni@gmail.com

Portfolio: marcelinosandroni.com

PROFESSIONAL SUMMARY

A software engineer drawing on almost eight years in modern ecosystems (Node, Go, React, Python) and fifteen in corporate and financial backgrounds. I work from cloud-native greenfield systems through to decoupling critical systems, focused on high-scale microservices, micro-frontends and corporate AI (agents/RAG) — delivering performance, scalability and resilience for mission-critical applications under an uncompromising testing culture.

KEY PRODUCTION IMPACT METRICS

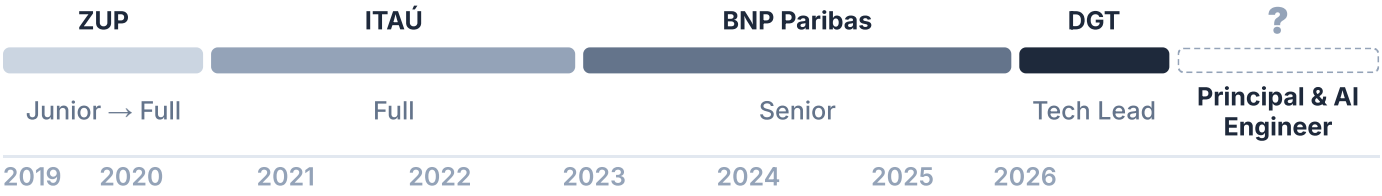

+R$ 500Bn
ASSET MANAGEMENT
B2B platforms for fund custody and orchestration.

10x
ETL PERFORMANCE
Relational to Go and Node microservices migration.

100M+ msgs/day
HIGH SCALE
Event-driven, serverless and fault-tolerant.

-50% Costs
FINOPS OPTIMISATION
Auto-scaling and right-sizing in cloud ecosystems (AWS).

CAREER TIMELINE IN ENGINEERING

TECHNICAL SKILLS & SOFTWARE ARCHITECTURE

Frontend & Mobile: React, Next.js, Angular, React Native, Flutter, Micro-frontends, Tailwind, SSR, Zustand, Redux, Design Systems.

Backend & Frameworks: Node.js (NestJS, Express), Go, Python, RESTful, gRPC, WebSockets, GraphQL, OAuth2, OIDC, JWT, mTLS.

Artificial Intelligence & Data: LLM integration (OpenAI, Claude, Gemini), RAG, agentic workflows, LangChain, vector databases (pgvector, Milvus).

Cloud & DevOps: AWS (EKS, S3, SQS, Lambda), Docker, Kubernetes (Helm), Terraform, CI/CD (GitHub Actions, Jenkins), Datadog.

Architecture & Messaging: Microservices, clean architecture, DDD, CQRS, SOLID, EDA, Apache Kafka, RabbitMQ, circuit breakers.

Analytics Ecosystem & Databases: PostgreSQL, MongoDB, Redis, ClickHouse, DynamoDB, DocumentDB, Snowflake, Databricks.

ACADEMIC EDUCATION & SPECIALIZATIONS

BSc in Computer Engineering — UNIVESP, 2021 – 2026
BSc in Accounting — Estácio, completed 2017

LANGUAGES

Spanish: Básico — reading technical material and written communication.
Professional English: Fluent — meetings, negotiation, architecture and code review.

PROFESSIONAL EXPERIENCE

Senior Software Engineer & Tech Lead | DGT **(1 year) · Oct/2025 – Sep/2026**

Stack: Node.js, React, Next.js, Go, Python, AI, PostgreSQL, ClickHouse, Redis, RabbitMQ, gRPC, Kubernetes, AWS.

- **Technical Leadership & High Throughput:** Led a squad restructuring systems processing 100M+ messages/day. Migration to ClickHouse and heavy microservices in Go and Node.
- **Corporate AI Integration:** Implemented real-time agentic flows connecting the backend to LLMs (Python/LangChain), delivering absolute accuracy and protecting a R$ 24M/year contract.
- **Enterprise Micro-frontends:** Built complex web dashboards in React and Next.js with a micro-frontends architecture, keeping the experience fluid under heavy browser processing load.

Senior Software Engineer | BNP Paribas **(2 years and 10 months) · Dec/2022 – Sep/2025**

Stack: Node.js, React, Angular, Go, PostgreSQL, Kafka, OAuth2, Kubernetes, Jenkins, Helm.

- **Monolith Modernisation:** Technical pillar decoupling legacy banking systems (COBOL/VB) into Node and Go microservices, reaching 95% test coverage.
- **D+0 Settlement & Real Time:** Replaced D+1 pipelines with real-time fund reconciliation on Kafka, lifting assets under management by 45% with a 100% uptime SLA.
- **Global Orchestration:** Automated institutional ETF funds, integrating B3 and international exchanges, with an estimated R$ 50 million in operational inflows for the bank.

Full Software Engineer | ITAÚ **(2 years and 5 months) · Jul/2020 – Nov/2022**

Stack: Node.js, NestJS, React, TypeScript, PostgreSQL, Redis, Kafka, AWS, K8s, Terraform.

- **Strategic Institutional Custody:** Full-stack development of a B2B portal focused on UX, pairing a React frontend with reactive, high-availability APIs orchestrated in Node.js.
- **Crisis Management and Resilience:** Surgical intervention in critical asynchronous messaging flows (Kafka) under heavy traffic, guaranteeing full transactional integrity of assets.
- **E2E Automation:** Led rigorous automated testing with Cypress, shielding the ecosystem from systemic regressions and accelerating the delivery pipeline.

Full Software Engineer | ZUP **(1 year and 4 months) · Mar/2019 – Jun/2020**

Stack: Node.js, React, TypeScript, PostgreSQL, Redis, RabbitMQ, AWS, Docker, CI/CD.

- **Accelerated Cloud Migration:** Promoted to Full within a year. Migrated infrastructure to AWS and refactored Node.js APIs for messaging in half the agreed schedule.
- **Transactional Resilience:** Structural fix to asynchronous messaging (RabbitMQ) with circuit breakers and DLQs, guaranteeing 100% transactional accuracy and failure recovery.

Accounting Analyst & Finance Manager | Consultoria **(15 years and 6 months) · Jul/2003 – Dec/2018**

- **Corporate Engineering Edge:** Team leadership and process redesign that cut the accounting close by 83%. Financial expertise translated into high-ROI software.
